Vimar offers powerful and compact cleaning capabilities in the Elgin Broom Badger

According to the Weather Network, spring has arrived, and that means the 'Spring Clean Up' is right around the corner. Vimar Equipment's latest offering from Elgin Sweeper Company is the Broom Badger mechanical sweeper. This dual-engine sweeper, is easy to operate and maintain and does not require a CDL to operate, making it ideal for our municipal and contractor customers who need powerful cleaning

without a full-size sweeper. The compact, low-profile design allows easy access to tree-lined streets. The short, 109-inch (2769 mm) wheelbase and a tight turning radius give the

operator great maneuverability for cul-de-sac curb lines and tightly winding streets without sacrificing robust sweeping performance. Call Vimar to book a demo at 604-430-4274

Vimar and Westech are getting *EXTREME*

At Vimar Equipment we strive to offer equipment that can satisfy the needs of our customers across the province. Westech, as backed by Federal Signal, delivers designs and equipment that have been rigorously tested for over two decades in the world's toughest operating conditions. Western Canada is one tough place to run a vac truck. Extreme weather conditions, bad roads, rough terrain, and distant/remote work sites

can make a difficult job even harder. Fortunately, our industry-leading Hydrovac solutions are designed to outlast everything that Mother Nature and

operational requirements throw their way.

Vimar Equipment and Westech are taking quality to the extreme and bringing it to our customers.

StoneAge, Inc. is one of the world's leading manufacturers of high-pressure waterblast tools and automated equipment for industrial companies and contractors worldwide.

Vimar Equipment named as the exclusive BC dealer of Warthog Nozzles

Vimar Equipment is pleased to announce we are the exclusive sales partner for Warthog Sewer Nozzles in British Columbia, Canada. StoneAge Waterblast Tools' line of Warthog Sewer Jetting and Hydro-X Nozzles are the industry's most powerful and durable sewer tools. This sales partnership will allow for a tailored approach to sales and support within the British

Columbia region. Both StoneAge and Vimar Equipment are customer-focused companies with decades of experience selling and supporting municipal and environmental contractors.

With more than a dozen sales of nozzles since partnering with StoneAge in the last half of 2016, we have satisfied a lot of customers' needs and plan for continued growth in sales in 2017.

The Switcher nozzle is an industry innovator with the ability to get the job done with half the runs, less time, and less water because it is a pulling/flushing nozzle and descaling nozzle in one.

Troy Whitton of Vimar states, "Our customers see this nozzle in action and need to have it, this nozzle is amazing!"
