APXX™ IN A CLASS OF ITS OWN

APXX is the peak performer of heavy-duty vacuum excavators. Built to operate in the most rugged climates and environments, it reaches new heights by delivering a combination of standard features that make this machine rise to a class of its own.

Designed with multiple axle options, the APXX is positioned to maximize legal payload and make time on the job more profitable.

Operator comfort is second to none, thanks to the standard double-walled storage cabinet that provides operators a break and protection from the elements while supporting productivity in cold climates. The quiet operation of the venturi injection system on the Hibon blower provides state-of-the-art sound reduction technology for operators as they perform vacuum excavation applications.

PEAK PERFORMANCE. PEAK PRODUCTIVITY. PEAK PAYLOAD.

The TRUVAC APXX full-size vacuum excavator is designed for extreme performance and productivity. With maximum axle capacity and payload, APXX delivers more time on the job for a broad range of applications that serve vacuum excavation contractors.

CAPABILITIES

- Hydro Excavation
- Air Excavation
- Potholing/Daylighting to locate underground utilities
- Keyholing for HDD installations
- Slot Trenching
- Cleanup of flood water, drilling spoils, catch basins, construction sites
- Valve box repairs
- Removal of non-hazardous liquids

FEATURES

- 5,250 cfm blower
- Hibon 8702-VS Blower
- Classic style control system
- Large cross over water cabinet with tool storage
- Choice of chassis axle configurations
- Debris body vibrator
- 3/4 opening rear door
- 50° debris body dump angle

APXX IS USED FOR APPLICATIONS IN:

- Industrial
- Gas industry
- Power industry
- Military
- Environmental
- Telecommunications
- Construction
- Water & sewer systems
- Railroad
- Airports
- Oil fields
- Tunneling
- Utilities
- Nuclear
- Landscaping
- Road Construction
